

Reflection:

1. In retrospect, what could you have done better to reduce the time you spent solving this assignment?

I should've been more observant about how math calculates the direction traveled as I initially got the y axis numbers flipped when using arctan. I would also say it did take time for me to learn to properly make these new test cases.

2. What could the Principles of Software staff have done better to improve your learning experience in this assignment?

I thought all material needed to excel at this homework was covered clearly in class.

3. What do you know now that you wish you had known before beginning the assignment?

I wish to keep the design simpler to make it easier to understand
