

Reflection

1. In retrospect, what could you have done better to reduce the time you spent solving this assignment?

I could've gone into this knowing more JavaFX features and I could've done a better job finding articles explaining these features and what they do. I didn't know anything about JavaFX before this homework so I did a lot of reading to find out what features I could use to better enhance my GUI performance.

2. What could the Principles of Software staff have done better to improve your learning experience in this assignment?

I wished we had a small part of a lecture talking about the Object types within JavaFX and simple methods for those objects to quicken how I picked up this new skill.

3. What do you know now that you wish you had known before beginning the assignment?

I wished I had a better understanding of what JavaFX is and what objects / tools / methods I was able to use. Knowing this would've saved me time and caused less frustration from my end.
