Reflection:

In retrospect, what could you have done better to reduce the time you spent solving this homework?

I should've done more reading about Java and it syntax / features.

What could we, the teaching staff, have done better to improve your learning experience in this homework?

I think this homework was fine and yall did a good job making it.

What do you know now that you did not know before beginning the homework?

I have a better understanding of how to write good code.
